

## SOCIAL LAB

*It's not rocket science. It's social science – the science of understanding people's needs and their unique relationship with art, literature, history, music, work, philosophy, community, technology and psychology. The act of design is structuring and creating that balance.*

**Clement Mok**

*Social science the name itself involves the society of the human race. That study of the subjects brings a child close to the society; enable him or her to identify the root cause of every social issue and equips for bringing out effective solution to those causes and problems. Our social lab has been designed in the same way so as to make the subject more attractive, fascinating and convenient to learn with the help of models, samples, maps, globe, charts related to history, geography and civics topics. it will enable the students to develop an interest and make them curious to know the facts and figure of our heritage.*
